

PRODUCT_AND_UX.md

YourBuy — Product & UX Master Document

DATABASE ENGINE (VERY IMPORTANT)

The entire YourBuy project MUST use:

MySQL ONLY

Ignore all PostgreSQL references from older documentation.

All implementations must remain:

- MySQL-compatible
 - scalable
 - modular
 - production-oriented
-

1. PRODUCT OVERVIEW

Product Name

YourBuy

Product Type

AI-powered simulated trading and investing platform.

Core Product Goal

Create a platform where users can:

- practice investing
- simulate trading realistically

- understand markets
- build portfolios
- learn naturally while using the platform
- receive contextual AI intelligence

WITHOUT the platform feeling like:

- a tutorial app
- a classroom product
- a basic stock simulator

The experience should feel:

- realistic
 - premium
 - intelligent
 - modern
 - startup-grade
-

2. TARGET AUDIENCE

Primary Users

- beginner investors
 - students
 - aspiring traders
 - first-time market participants
-

Secondary Users

- intermediate traders
 - finance enthusiasts
 - experienced users wanting simulation environments
-

3. USER EXPERIENCE PHILOSOPHY

YourBuy must balance:

Professionalism
+
Beginner Accessibility

+
Realtime Realism
+
Contextual Intelligence

UX Goals

The product should:

- feel smooth
 - feel responsive
 - feel intelligent
 - remain readable
 - avoid overwhelming users
 - avoid childish teaching
 - remain financially realistic
-

4. CORE UX PRINCIPLES

Principle 1

Adaptive complexity.

Users should not see unnecessary complexity early.

Principle 2

Education should feel integrated naturally.

NOT like mandatory lessons.

Principle 3

The platform should feel like a real broker platform.

Principle 4

AI should enhance workflows.

NOT dominate the product.

Principle 5

Backend correctness matters more than flashy UI.

5. USER LEVEL SYSTEM

Level 1 — Beginner

Experience Style

- guided
 - simplified
 - assisted
 - less dense
-

Features

- onboarding overlays
 - contextual explanations
 - AI hints
 - guided walkthroughs
 - simplified dashboards
 - safer workflows
-

Important Rule

Do NOT make beginners feel stupid.

The platform must still feel premium.

Level 2 — Intermediate / Advanced

Experience Style

- faster
- denser
- more analytical

- less guided
-

Features

- advanced analytics
 - reduced guidance
 - more market data
 - advanced chart workflows
 - optional advanced features
-

Level 3 — Professional Tracking Layer

Separate optional section.

Supports:

- deeper analytics
 - advanced tracking
 - advanced portfolio understanding
 - more professional workflows
-

6. ONBOARDING EXPERIENCE

Step 1 — Signup

User creates account.

Step 2 — Questionnaire

Questions determine:

- investing knowledge
 - risk understanding
 - market familiarity
 - preferred learning style
 - UI complexity level
-

Step 3 — Adaptive Setup

Platform generates:

- adaptive dashboard
 - personalized onboarding
 - customized AI behavior
 - recommended workflows
-

7. LANDING PAGE UX

Landing Page Goals

Landing page should:

- look premium
 - establish trust
 - explain product clearly
 - showcase AI intelligence
 - convert visitors efficiently
-

Visual Style

Inspired by:

- premium fintech startups
 - modern broker apps
 - clean finance dashboards
 - Certus Finance polish
-

8. LANDING PAGE STRUCTURE

Main Sections

Hero Section

- strong headline
- realtime market visuals
- CTA buttons
- subtle animations

Product Showcase

- portfolio previews
- AI assistant showcase
- smart analytics previews

AI Intelligence Section

Show:

- news analysis
- sector intelligence
- portfolio insights
- smart alerts

Trading Features Section

Show:

- portfolio tracking
- F&O simulation
- mutual funds
- realtime charts

Educational Layer Section

Show:

- adaptive onboarding
- guided workflows
- contextual education

CTA Section

Encourage:

- signup
 - platform exploration
-

9. AUTHENTICATION UX

Login Page

Should feel:

- clean
 - minimal
 - modern
 - trustworthy
-

Signup Flow

Should feel:

- guided
 - frictionless
 - premium
-

Authentication Rules

- minimal unnecessary fields
 - smooth transitions
 - fast completion
-

10. DASHBOARD PHILOSOPHY

Dashboard should feel:

- professional
 - readable
 - realtime
 - intelligent
 - polished
-

Dashboard Goals

Balance:

Information Density
+
Readability
+
Realtime Updates
+
Smooth UX

11. DASHBOARD LAYOUT SYSTEM

Hybrid Navigation Architecture

Top Navigation

Contains:

- search
 - notifications
 - AI access
 - market overview
 - profile controls
-

Sidebar / Hamburger

Contains:

- portfolio
 - watchlists
 - trading
 - mutual funds
 - F&O
 - learning dashboard
 - settings
 - advanced analytics
-

12. RESPONSIVE UX STRATEGY

Mobile Philosophy

Mobile experience should remain:

- polished
 - professional
 - readable
 - responsive
-

Mobile Requirements

- adaptive navigation
 - collapsible sidebar
 - optimized charts
 - smooth scrolling
 - optimized AI panel
-

13. INFORMATION DENSITY STRATEGY

Philosophy

Use:

Hybrid Information Density

Meaning:

- not too empty
 - not too cluttered
-

Beginner Experience

- cleaner layout
 - less noise
 - reduced complexity
-

Advanced Experience

- more analytical density
 - faster access to tools
 - richer data presentation
-

14. PORTFOLIO UX

Portfolio Goals

Portfolio should:

- remain readable
 - remain realistic
 - feel professional
 - avoid overwhelming layouts
-

Main Sections

- holdings
 - profit/loss
 - allocation
 - sector exposure
 - historical performance
 - recent activity
-

15. WATCHLIST UX

Watchlist Goals

Watchlists should:

- update realtime
 - feel lightweight
 - remain quick to access
 - support AI insights
-

16. MARKET EXPERIENCE UX

Market Pages Should Include

- realtime charts
 - stock overview
 - sector performance
 - AI insights
 - related news
 - impacted sectors
 - impacted stocks
-

17. TRADING UX

Trading Philosophy

Trading should feel:

- realistic
 - smooth
 - trustworthy
 - responsive
-

Important Rule

Even though the platform is simulated:

- it should NOT feel fake
 - it should NOT scream “simulation app”
-

18. ORDER FLOW UX

Flow

```
Select Stock
↓
Analyze Market Data
↓
Place Simulated Order
```

↓
Portfolio Updates
↓
Realtime Sync

19. F&O EXPERIENCE

Goals

- educationally integrated
 - realistic
 - visually understandable
 - not intimidating initially
-

Beginner Strategy

Use:

- guided overlays
 - explanations when needed
 - simplified terminology initially
-

20. MUTUAL FUND EXPERIENCE

Goals

- simpler than stocks
 - beginner-friendly
 - visually clean
 - easy comparison flows
-

21. AI UX PHILOSOPHY

AI Name

YourBuy Intelligence

AI Purpose

AI should:

- assist users
- explain context
- summarize information
- detect patterns
- enhance workflows

NOT replace user thinking.

22. AI POSITIONING SYSTEM

AI can appear as:

- floating assistant
- contextual side panel
- smart alert engine
- inline intelligence cards

Users may later customize placement.

23. AI BEHAVIOR RULES

AI MUST:

- remain contextual
- understand viewed stocks
- understand portfolio exposure
- understand news context
- understand market context

AI MUST NOT:

- sound generic
 - hallucinate data
 - promise profits
 - behave unrealistically
-

24. NEWS INTELLIGENCE UX

Core Flow

```
graph TD; News --> AI_Analysis[AI Analysis]; AI_Analysis --> Affected_Sectors[Affected Sectors]; Affected_Sectors --> Impacted_Stocks[Impacted Stocks]; Impacted_Stocks --> Educational_Explanation[Educational Explanation];
```

UX Goals

Users should quickly understand:

- what happened
 - why it matters
 - which sectors are affected
 - which stocks are impacted
-

25. SMART ALERT UX

Smart Alerts Should Include

- stock movement alerts
- sector alerts
- portfolio alerts
- news impact alerts
- AI-generated intelligence alerts

Alert Philosophy

Alerts should:

- feel useful
- avoid spam
- remain readable
- remain contextual

26. LEARNING EXPERIENCE

Learning Philosophy

Learning should happen naturally.

NOT through:

- forced lessons
- classroom experiences
- interruption-heavy tutorials

Integrated Learning Methods

- contextual AI explanations
- guided overlays
- realtime examples
- intelligent hints
- progressive unlocking

27. SETTINGS UX

Settings Include

- theme mode
- AI positioning
- notification controls
- experience level
- advanced feature toggles
- privacy settings

28. DARK MODE / LIGHT MODE

Default

Light mode.

Support

- dark mode
 - remembered preferences
 - smooth transitions
-

29. SEARCH EXPERIENCE

Unified Intelligent Search

Search should support:

- stocks
 - sectors
 - watchlists
 - portfolio assets
 - AI contextual results
 - news
-

30. EXIT EXPERIENCE

Important Rule

Users should NOT instantly disable educational guidance.

Instead:

- show exit questionnaire
 - understand why
 - adapt system intelligently
-

31. PERFORMANCE UX PRINCIPLES

UI should feel:

- smooth
 - fast
 - responsive
 - lightweight
-

Optimize

- chart rendering
 - dashboard loading
 - websocket updates
 - AI panel loading
 - mobile responsiveness
-

32. ANIMATION PHILOSOPHY

Animations should:

- feel premium
 - feel subtle
 - improve UX
 - avoid distraction
-

Use Cases

- transitions
 - hover states
 - onboarding flows
 - dashboard interactions
 - AI panel behavior
-

33. VISUAL IDENTITY

YourBuy should visually feel:

- modern

- intelligent
 - trustworthy
 - financially professional
 - startup-grade
-

34. ENGINEERING UX RULES

Rule 1

UI should NEVER feel cluttered.

Rule 2

Backend correctness matters more than flashy UI.

Rule 3

Beginner users should feel guided, not restricted.

Rule 4

Advanced users should move faster.

Rule 5

AI should feel integrated naturally.

Rule 6

Realtime updates should remain smooth.

Rule 7

Learning should remain contextual.

Rule 8

The platform should feel like a real investing product.

35. FINAL PRODUCT SUMMARY

YourBuy is designed as:

- a premium investing simulator
- an AI-powered finance intelligence platform
- a realistic trading ecosystem
- an adaptive learning environment
- a scalable fintech-style dashboard system

The product prioritizes:

- realistic investing UX
- contextual AI assistance
- adaptive complexity
- professional dashboards
- smooth realtime experiences
- clean financial workflows

while avoiding:

- childish tutorials
 - cluttered dashboards
 - generic AI behavior
 - unrealistic investing flows
 - poor mobile experiences
 - overwhelming beginner workflows
-
